

## PREFILLING U-MULTIRANK DATA FOR FRANCE

---

U-Multirank is a multidimensional and inclusive ranking for higher education institutions (HEIs). To increase the coverage and therefore, the representativeness of the data, we use publicly available data sources to prefill the values for institutions. Publicly available sources are also used to cross-reference the information retrieved from institutions themselves. This document provides an overview of the sources found and reviewed, their use for cross-referencing and prefilling values for higher education institutions in France.

While we try to consult national experts to validate the data as much as possible, we recognise that available data and definitions can change over time and better sources emerge. Thus, we welcome your feedback in case you think that the approach used here is not representative of your institution or country, or you are aware of alternative or better sources.

The publicly available data source used for populating data for the French HEIs are:

- **Ministère de l'Enseignement Supérieur et de la Recherche:** Opendata

### NATIONAL

Measurement level: Institutional level (HE Provider). Data aggregated at a higher level is not suitable for U-Multirank.

The data from the French ministry is free to copy, use, share, and adapt for any purpose.

Data obtained for U-Multirank:

- Student data (e.g. enrolment, new entrants, graduate, international student data)
- Academic staff data (e.g. academic staff employed(FTE/HC), female academic staff)

U-Multirank is based on a 3-year average with a two-year time lag. Thus, U-Multirank 2022 will contain 2018-2020 data. For 2022 U-Multirank ranking we used 2018 (2018/19 data), 2019 (2019/20) and 2020 (2020/21) data.
